DareDisrupt

A screenshot of a video post from the subreddit r/technology. The title of the video is "Maersk experimenting with 3D printing aboard tanker ships [1:31]" and it was submitted 2 years ago. The video thumbnail shows a 3D printer in operation. A red circle highlights a comment at the bottom of the post: "They should print her a hairbrush." The text "DareDisrupt" is visible in the bottom right corner.

## Your computer could be 1000 times faster in the future, thanks to graphene

Graphene possesses a set of unique properties, making it a "wonder" material.

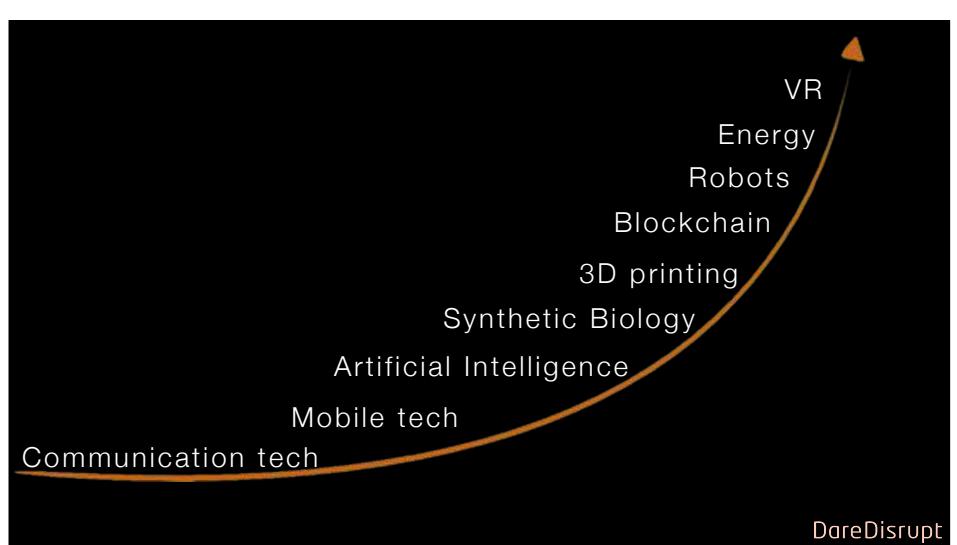

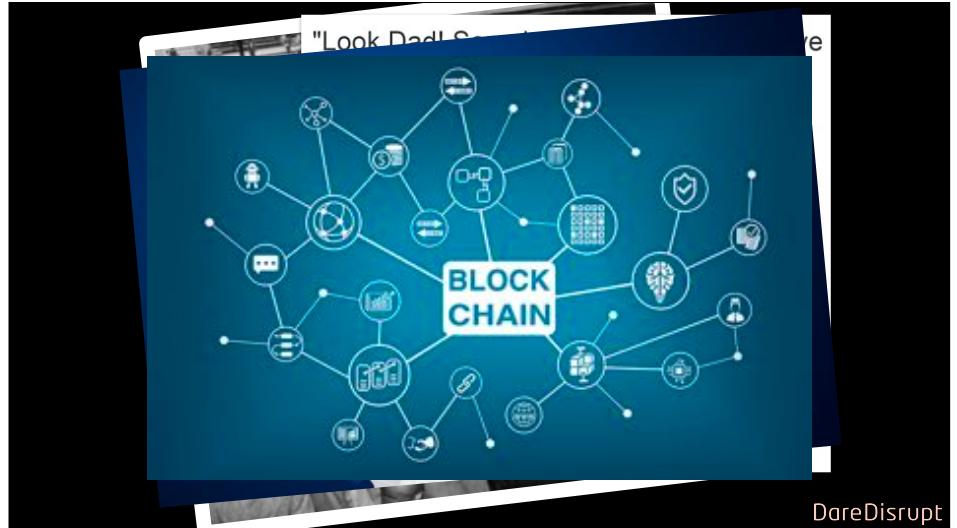

In brief

Researchers from several universities have teamed up to develop a radical kind of transistor. Instead of using silicon, the team used graphene to build a logic gate series that uses less power but could work 1,000 times faster than current ones.
