Betterment Adds More Human Advice to Its Robo Services

Automated-investing firm streamlines offering, cuts some prices

By Anne Tergesen
July 26, 2017 9:00 a.m. ET

A company founded on the idea of managing money for individuals based on algorithms is adding more advice from humans.

Robo-adviser Betterment LLC plans to unveil on Wednesday expanded access to human advice with an unlimited text-messaging service, while also cutting 20% off the price of its "premium" service that provides telephone access to a team of planners.

The moves will take the robo-advice pioneer further into...

MAKE IT WITH ADOBE STOCK.

Evolution of Robo advice

1. Questionnaire and risk-based asset allocation
2. Re-balancing towards target portfolio
3. Investment strategy and algorithm-based adjustments based on customer behaviours
4. Advice based on complete customer profile on income and risk exposure

HUMANS vs. MACHINES

COGNITIVE SYSTEMS CREATE A NEW LINK

HUMANS EXPERTS IN

COMMON SENSE

MORALS

IMMENSE CAPACITY

AI VISION

WHERE AI COMES TO PLAY

LEVERAGE AI TO ENABLE WORLD CLASS ADVICE TO ALL

SCALE FS

Use power of machines

Scale financial services only available for a few to all, at an extremely low cost

BIG DATA

Use machine learning

Analyze larger amount of data than any human possibly can, to achieve even sharper financial advice, and learn on trends and fluctuations

COMMUNICATE

Use cognitive systems

Communicate with customers in a natural language

STEP 1: ROBOSAVE

THE BRAINS BEHIND ROBOSAVE

INTELLIGENT ALGORITHMS are used to assess customer's knowledge & experience, investment objective, and time horizon to provide a portfolio recommendation

A CHATBOT that becomes more and more sophisticated when assessing our customers

AUTOMATED MONTHLY DEPOSITS

trading based on assessing customer's holdings to grow the portfolio aligned with target

STEP 2: AMELIA

NORDNET'S AMELIA STRATEGY

MVP LAUNCH

Nordnet's MVP launches include:

Improved on-boarding process

Recommendation engine

24/7 support

NATURAL LANGUAGE

Amelia is a 3rd party component enabling natural language communication

Unique cognitive capabilities for managing complex dialogues

Ability to learn quickly and adapt to customer behaviour, intent, and actions

Respond to analytical triggers in real-time

THE FUTURE OF FINANCE STARTS WITH MACHINES

Only machines can analyze large sets of data in such speed to make an impact on future finances

Only through machine learning it is possible to understand patterns in both data and user behaviour to tailor-made financial advice

Cognitive systems can overlap the need of human like communication
